

FACTS

Addiction is a disease. It cannot be cured, but it can be managed with medication, counseling, and support.

The goal of Medication Assisted Treatment is to recover from addiction. It does NOT replace one addictive drug with another. It provides a safe, controlled level of medication to overcome the use of a problem with opioids or alcohol are as follows:

- ✦ Methadone
- ✦ Naltrexone
- ✦ Suboxone
- ✦ Zubsolv
- ✦ Bunavail

This is a collaboration partnership between Hope Mobile Clinic and Victory Through Faith Recovery Services.
